

# KERKAU LONG WELD NECK FLANGES

Kerkau Manufacturing proudly offers a large selection of ASME B16 rated Long Weld Neck flanges (LWN). Stainless or carbon steel grades are available from stock inventory in 304/L & 316/L or A105 & A350 LF2. LWN flanges are stocked in lengths of 9" and 12". LWN flanges do not feature a weld bevel, the hub is machined flush with an inside diameter matching the nominal pipe size. Kerkau can machine any dimensional Weld Bevels, Inside Diameters, Facing or Lengths to customer specifications upon request. With one of the largest selections available in North America, Kerkau can supply nearly all size ranges available from stock or with quick turnarounds.

When your next project calls for Long Weld Neck flanges, you can count on Kerkau Mfg. to supply only the highest quality, precision machined flanges the industry has to offer.
